Architecture

Navigation Design

- Always a left chevron (<) top left when not at first layer navigation. - Add title of previous card only if there is room

- Centered, one line title

- Edit, Done or nothing top right - Not x, status or non-actionables

- If "Done" is the top right choice and data is not saved "Cancel" is often the top left choice in place of the chevron

Structure / Architecture

- ./src/
  - /screens
    - [name].screen.js (CarefeedScreen.js)
